

Year 11 Health & Human Development Unit 2

SAC 2- Case Studies & Data Analysis

Covering chapters 10, 11 & 12

The following is a guide to what you need to know for the SAC:

- Stages of adulthood and appropriate ages
- Social, emotional, intellectual and physical development of adults
- Current health status of Australian adults
- Differences in health status between different population groups within Australia. What are the main health concerns for these population groups? (males and females, Indigenous Australians, low socioeconomic status and people living in rural and remote areas)
- Changes in the stages of adulthood
- Determinants of health of adults- specific examples for each of the determinates
- Interpreting graphs and other data

**The SAC will be on Tuesday 17th September in class.
If you are absent you must have a medical certificate.**
